

AHMED SAAD

Applied AI Engineer | Enterprise AI Solutions Architect
Production Agentic AI | Technical Deployment | Salesforce CTA
MENA / Remote | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Applied AI Engineer, Salesforce CTA, Enterprise AI Solutions Architect, and Solutions Engineer with nearly 20 years across software engineering, post-sales Program Architecture, technical pre-sales, and production AI deployment across GCC, EMEA, and APAC.

Leads from executive discovery and business case through solution design at scale, technical validation, production go-live, and adoption; led an Arabic/English regulated public-sector AI tax service into production and builds selected Agentforce, Python, and REST API components.

CORE SKILLS

Commercial & Deployment: Program Architecture | Technical pre-sales | Executive discovery | Account Executive partnership | Use-case prioritization | Business cases | Technical wins | Business value and KPIs | Solution design at scale | Production go-live | Adoption

AI Architecture & Build: Salesforce Agentforce | Data Cloud | MuleSoft | Generative AI and large language models (LLMs) | Retrieval-augmented generation (RAG) | Python | REST APIs | Enterprise integration | CI/CD

Agent Evaluation & Observability: Versioned golden datasets | Offline and online evals | Multi-turn regression testing | Human-calibrated LLM-as-a-judge grading | CI/CD quality gates | Session and trajectory tracing | Quality, safety, availability, scalability, latency, cost, and escalation monitoring

Languages: Arabic — Native | English — Fluent

PROFESSIONAL EXPERIENCE

Distinguished Technical Architect | Salesforce | Dubai, UAE | Mar 2024 – Present

- **Production deployment:** Led phase-one production deployment of an Arabic/English AI tax-service solution for a regulated public-sector customer in MENA, owning architecture, production readiness, and go-live; defined the roadmap for expanded transactional, voice, and telephony capabilities.
- **Hands-on agent build:** Personally build and debug selected Agentforce actions, Python/REST API integrations, and agentic service workflows spanning knowledge-grounded guidance, transactional actions, and human escalation; delivered customer-environment proofs of value in 48 hours and led a cross-functional deployment pod.
- **Strategic pre-sales and value:** Partner with Account Executives from executive discovery and use-case qualification through business cases, technical win strategy, and delivery plans with milestones, dependencies, and acceptance criteria; define value KPIs and translate field needs into Product and Engineering requirements and reusable playbooks.
- **AI assurance and release gates:** Define versioned golden datasets, ground-truth test cases, acceptance thresholds, and multi-turn regression suites; combine LLM-as-a-judge grading and human calibration, and gate continuous integration/continuous deployment (CI/CD) releases against task success, retrieval groundedness, routing and tool accuracy, safety, latency, and cost.
- **Observability and reliability:** Define session and trajectory tracing across models, retrieval, routing, tools, guardrails, handoffs, and errors; use production telemetry for root-cause analysis and continuous tuning of quality, availability, scalability, reliability, resilience, security, privacy, data sovereignty, latency, cost, and rollback.

Founder & CTO | CirroDX | Dubai, UAE | Apr 2023 – Mar 2024

- **Advisory leadership:** Founded a boutique data and AI advisory practice serving enterprise clients across the GCC, focused on data modernization, predictive analytics, Salesforce Data Cloud, and GenAI adoption.
- **AI-ready foundations:** Architected regulated-industry data, integration, quality, and governance foundations for analytics, retrieval grounding, and production AI readiness.
- **Document intelligence:** Delivered intelligent automation and RAG-based document-processing patterns that reduced manual effort and improved document classification and turnaround.

Distinguished Technical Architect | Salesforce | London, UK | Feb 2022 – Mar 2023

- **EMEA solution shaping:** Led senior technical pre-sales across EMEA, partnering with Account Executives and CIO/CTO stakeholders on executive discovery, qualification, and strategic solution shaping for 25+ enterprise transformation initiatives.
- **Architecture at scale:** Served as architect of record for a banking Customer 360 transformation spanning 40+ systems, delivering solution design at scale across customer data, real-time risk insights, enterprise integration, analytics, and delivery governance.
- **Delivery readiness:** Designed secure, scalable cloud, data, API, and integration architectures across Salesforce and enterprise applications; translated technical trade-offs for C-suite executives and engineering teams into reference designs, activation plans, and delivery-readiness roadmaps.

Director, APAC Partner Solutions Advisory | Salesforce | Sydney, Australia | Jun 2020 – Jan 2022

- **Partner pre-sales:** Led APAC partner solutions advisory and pre-sales engineering, working with Sales and delivery partners to qualify, shape, and de-risk complex Salesforce, data, integration, analytics, and intelligent-automation opportunities across enterprise and public-sector customers.
- **Partner enablement:** Applied implementation experience to customer workshops, architecture reviews, partner enablement, technical-champion development, and reusable delivery guidance, strengthening partner readiness from technical validation through implementation.

Senior Technical Architect | Salesforce | Sydney, Australia | Sep 2016 – May 2020

- **Program architecture:** Served within the Customer Success Group as Program Architect and lead technical authority for an AUD30M NSW Family & Community Services transformation, providing hands-on architecture and implementation leadership across multiple workstreams.
- **End-to-end delivery:** Owned end-to-end architecture and technical delivery governance from discovery and solution design through implementation, production go-live, and transition to supported operations.
- **Technical authority:** Directed scalable data models, REST APIs, integration architecture, analytics foundations, security, governance, and non-functional requirements across Salesforce and connected enterprise systems.
- **Production governance:** Coordinated Salesforce, customer, and implementation-partner teams to resolve architecture decisions, technical dependencies, production-readiness risks, and delivery blockers across complex stakeholder groups.

EARLIER EXPERIENCE

Lead Solutions Architect | KPMG Australia | 2016

Lead CRM Architect | ACECQA Australia | 2015–2016

Senior CRM Consultant | Dialog Information Technology | 2012–2015

Software Consultant | Right Group | 2009–2012

Software Engineer | Santeon Inc. | 2007–2009

EDUCATION & CERTIFICATIONS

- Johns Hopkins University | Certificate Program in Agentic AI | In progress; expected Nov 2026
- University of Sydney | Postgraduate Diploma | 2021–2022
- Arab Academy for Science, Technology and Maritime Transport | Postgraduate Diploma, E-Business Management | 2009–2010
- Modern Academy for Computer Science & Information Technology | B.Sc., Computer Science | 2002–2007
- Salesforce Certified Technical Architect (CTA) | 30+ Salesforce certifications across architecture, Data Cloud, AI, Sales, Service, and Marketing
